

WORLD CLASS, LOCAL FOCUS

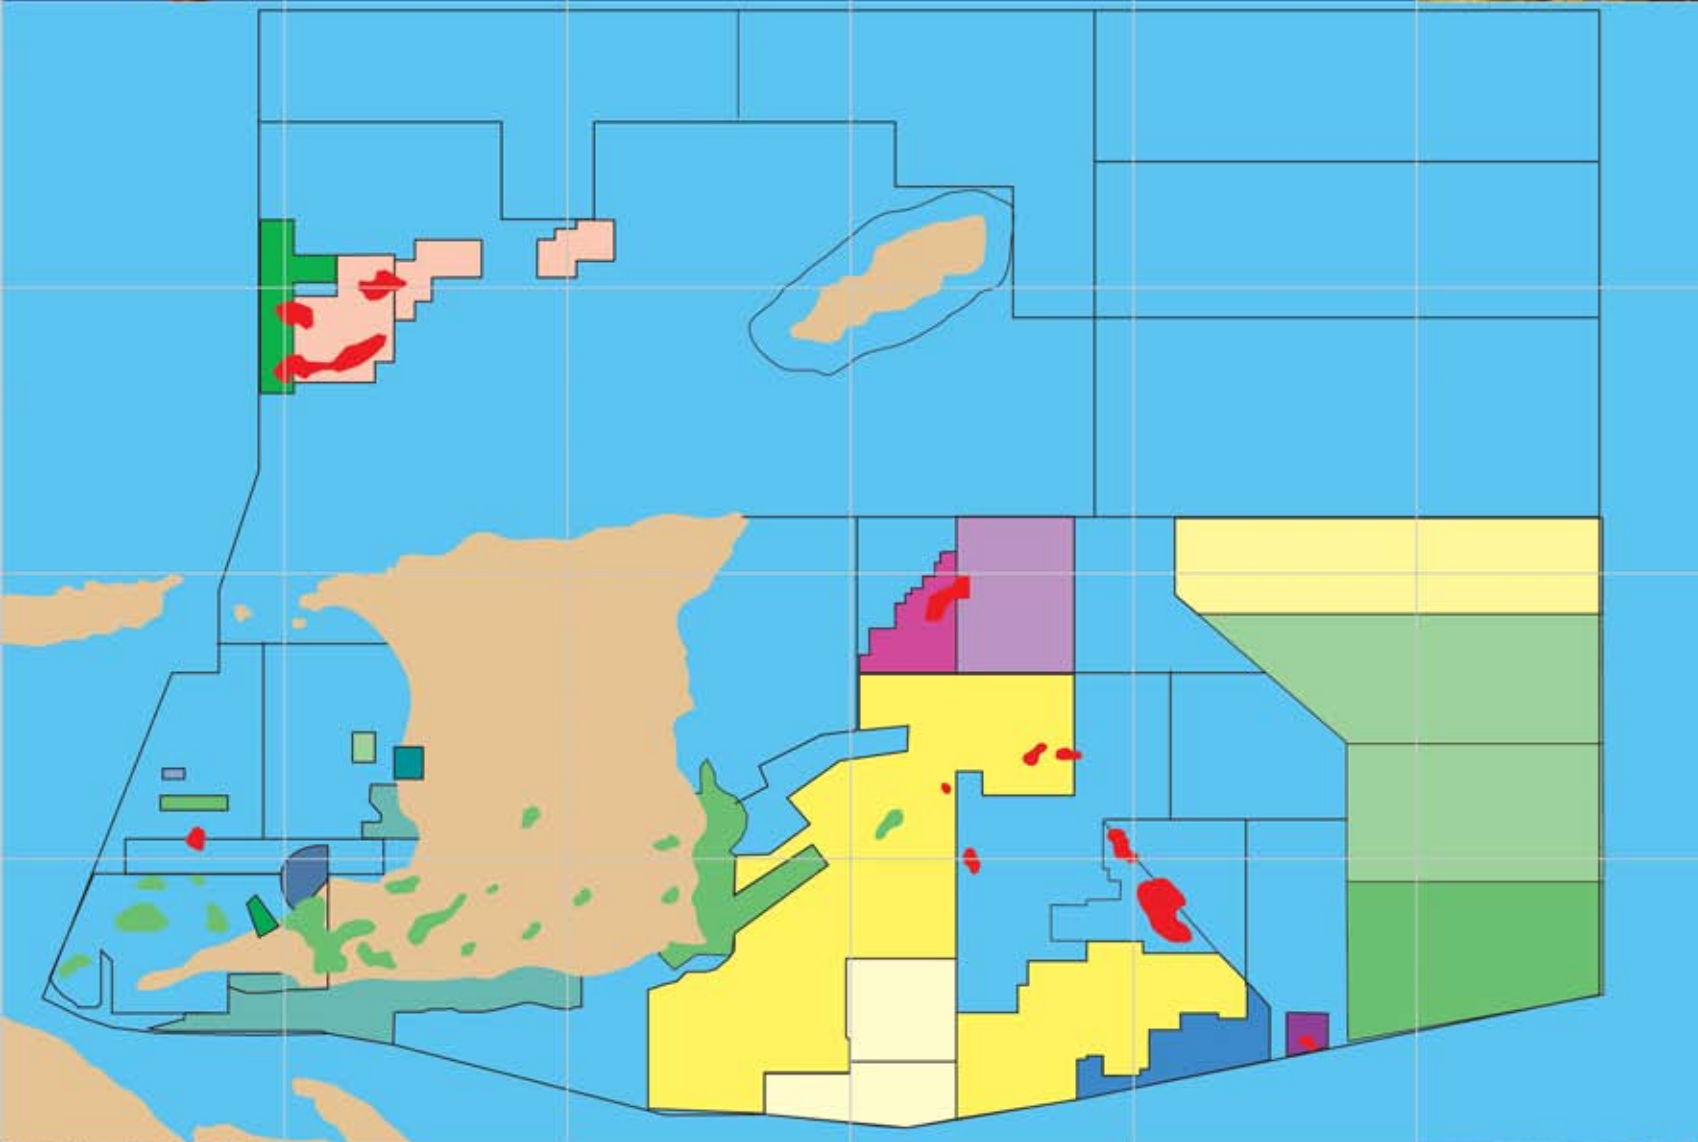

Project management for offshore platforms and subsea installations; onshore terminals and yards; pipelines; power generation installations and overhauls.

Engineering: conceptual, front-end, detail; life-of-field and EOR; surveys, evaluations and studies.

Supply chain management, including procurement and shipping of electrical equipment, downhole oil pumps, API, centrifugal pumps, air compressors, rigs, reciprocating pumps, industrial gases; and agent services.

Construction management, equipment installation and commissioning of greenfield and brownfield engineering projects; and decommissioning services.

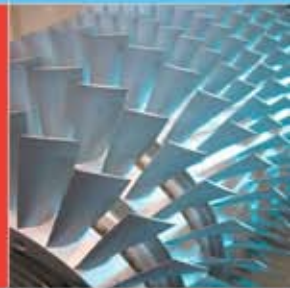

Consulting and technical support for deepwater engineering, pipelines, enhanced recovery, operating plant and equipment.

Overhaul and repair of rotating equipment: gas and steam turbines for power generation, compression and transmission; pumps; compressors; internal combustion engines.

Operational management of oil, gas, air separation and power facilities, and onshore lease farm-outs.

Program maintenance and modifications; OEM and third-party maintenance, refurbishment and testing programs.

NON-STOP SERVICES FOR A NON-STOP REGION.

Neal & Massy Wood Group

ON-THE-SPOT SERVICES FOR TRINIDAD AND TOBAGO.

Introducing a local company that has *world-class* experience for the systems and services you need now. When you are working in the Caribbean's largest producer of oil, natural gas and LNG, whether it is in the Eastern Atlantic Basin or south on the island, you can get support that is global in experience and locally based at the same time.

Neal & Massy Wood Group is "new" in one sense: we provide a combination of complementary skills and services focused entirely on the oil and gas, petrochemical and power industries here in Trinidad and Tobago. We may be familiar to you not only because of the work the Neal & Massy Group have been doing here, from offshore platforms to onshore terminals; but also because of Wood Group's ongoing activities in Venezuela and Colombia, in the Gulf of Mexico and the North Sea. We are working right here, right now. We deliver on time and on budget.

SPECIFIC SERVICES, SPECIFIC TO YOUR OPERATION.

To match your needs, **Neal & Massy Wood Group** lets you tap into a wide range of services for new and expanding operations:

- Project management
- Engineering
- Supply chain management and procurement
- Construction management, installation and commissioning
- Operational management
- Program maintenance and modification
- Consulting and technical support
- Overhaul and repair of gas and steam turbines and generators.

FUSION OF STRENGTHS AND CAPABILITIES.

Neal & Massy Wood Group combines Wood Group Trinidad & Tobago Ltd. with Neal & Massy Energy Ltd. Offices in Port of Spain and San Fernando oversee experienced engineers, managers and labourers throughout the energy sector here.

Wood Group Trinidad & Tobago Ltd. is part of John Wood Group PLC, the global energy services company with more than 14,000 employees operating in 36 countries. Three businesses – Engineering & Production Facilities, Well Support and Gas Turbine Services – deliver engineering, production support, maintenance management and gas turbine services that are recognized for high quality and dependability in oil and gas regions worldwide. To date, Wood Group companies have been deeply involved in Trinidad and Tobago, in subsea pipeline engineering and offshore facilities modifications.

Neal & Massy Energy Ltd. is a business unit of The Neal & Massy Group, with 4,000 people working in the majority of the English-speaking countries of the Caribbean. It brings energy products and systems, energy-related construction and supervision, logistics management and industrial gas capabilities to the partnership. Founded and operating in Trinidad and Tobago for more than 80 years, the group's intimate connections with business and industry add immense local knowledge to the entire energy sector value chain.

Neal & Massy Wood Group is a fusion of strengths and capabilities, focused to support you here in Trinidad and Tobago. Exploration, production and transportation activities keep growing, with new wells in near-offshore blocks and onshore areas, expanding loading and processing facilities, and pipelines. It is a non-stop business, so we offer non-stop support.

For owners, constructors, and operators, Neal & Massy Wood Group provides both local knowledge and global expertise that fully support operating margins in oil, petrochemicals, liquefied natural gas operations and power generation.

Every project can take advantage of fit-for-purpose local resources combined with international experience. Every project benefits from the best support services available.

EXAMPLES IN BREADTH OF SERVICES.

From engineering to operations, management to maintenance, Neal & Massy Wood Group is a one-call source for services and solutions from as close as Trinidad, Venezuela and Colombia, to as distant as Houston and the North Sea:

- Oil and gas production, transportation, and processing facilities engineering, design and production enhancement capabilities, for new fields or marginal properties.
- Innovative front-end engineering.
- Human resources management and training.
- Subsea and pipeline engineering, procurement, fabrication management and operations support.
- Deepwater and lightweight topsides design.
- Greenfield engineering and project support services.
- Equipment, systems and OEM maintenance.
- Gas, diesel and marine engines, and authorized technical support.
- Gas storage, distribution and application equipment, maintenance, testing, and engineering support.
- Overhaul, repair, testing and return-to-service of heavy and light gas turbines, steam turbines, generators, pumps and compressors.

HEALTH, SAFETY AND THE ENVIRONMENT FULL-TIME

Global and local standards in health, safe operations and environmental control are already an integral part of Neal & Massy Wood Group's operating philosophy: additional benefits of combining Wood Group expertise from all over the world and the highly skilled Neal & Massy workforce.

HS&E goals are part of performance and reward mechanisms in contracts. They are critically important in maintaining not only contract productivity, but positive attitudes of teamwork and achievement. Customers who involve us in projects and programs know that our standards will support their standards, and contribute to cost-effective operations.

Our capabilities extend to helping assure that Trinidad and Tobago's environmental goals are met. For example, Wood Group's affiliate, J P Kenny Inc., has performed front-end engineering to help BP address Trinidad Atmospheric Emissions Reduction objectives. The project cuts operational flaring and venting from the Beachfield gas facility in Guayaguayare bay and platforms in three offshore sites – Teak, Samaan and Poui – to reduce the emission of carbon dioxide equivalent by 1.5 million tons.

INTEGRATED OR INDIVIDUALIZED – TELL US WHEN AND WHERE.

Engineering support, O&M services, rotating equipment overhaul – Neal & Massy Wood Group assembles the right people and the right capabilities for an integrated, long-term program or an individual project, in line with your requirements. We deliver the project and risk management skills, the performance contracting experience and the specialists to meet the demand.
